

THE NEW TURBOCHARGED MAZDASPEED MX-5 MIATA

WHO KNEW THE MIATA HAD AN EVIL TWIN?

MAZDASPEED

We, MAZDASPEED, plead guilty, your honor, to contributing to the delinquency of a Miata. That's what MAZDASPEED is all about. Adding even more no-holds-barred performance to cars already legendary for it—for drivers seeking the ultimate four-wheel rush. The limited-edition MAZDASPEED MX-5 Miata being the latest case in point:

- IHI turbocharger, helping to generate 25% more horsepower and 33% more torque, for a better power-to-weight ratio than the BMW Z4 2.5.
- 6-speed short-throw transmission with shot-peened gears for improved durability.
- Heavy duty clutch.
- Tuned and lowered suspension including stiffer springs, retuned gas-filled Bilstein performance shocks, and thicker front and rear sway bars.
- Air-to-air intercooler.
- 17-inch Racing Hart alloy wheels.
- Toyo Proxes R28 205/40R17 tires.
- Torque-sensing limited slip diff.
- Optimized steering rack.
- 4-wheel disc brakes with ABS.
- Body-color air dam & rear spoiler.

Plus a complete MAZDASPEED interior package. Yes, your honor, we understand given the vehicle's performance, leniency is out of the question. Read our full confession at www.MazdaUSA.com/performance.
